Introduction

Document Purpose

This document outlines the architecture throughout multiple design levels.

Bucky's Barrels Project

Bucky's Barrels is a mobile-friendly 2D game allowing the player to go through obstacles, obtain powerups, and other gameplay mechanics.

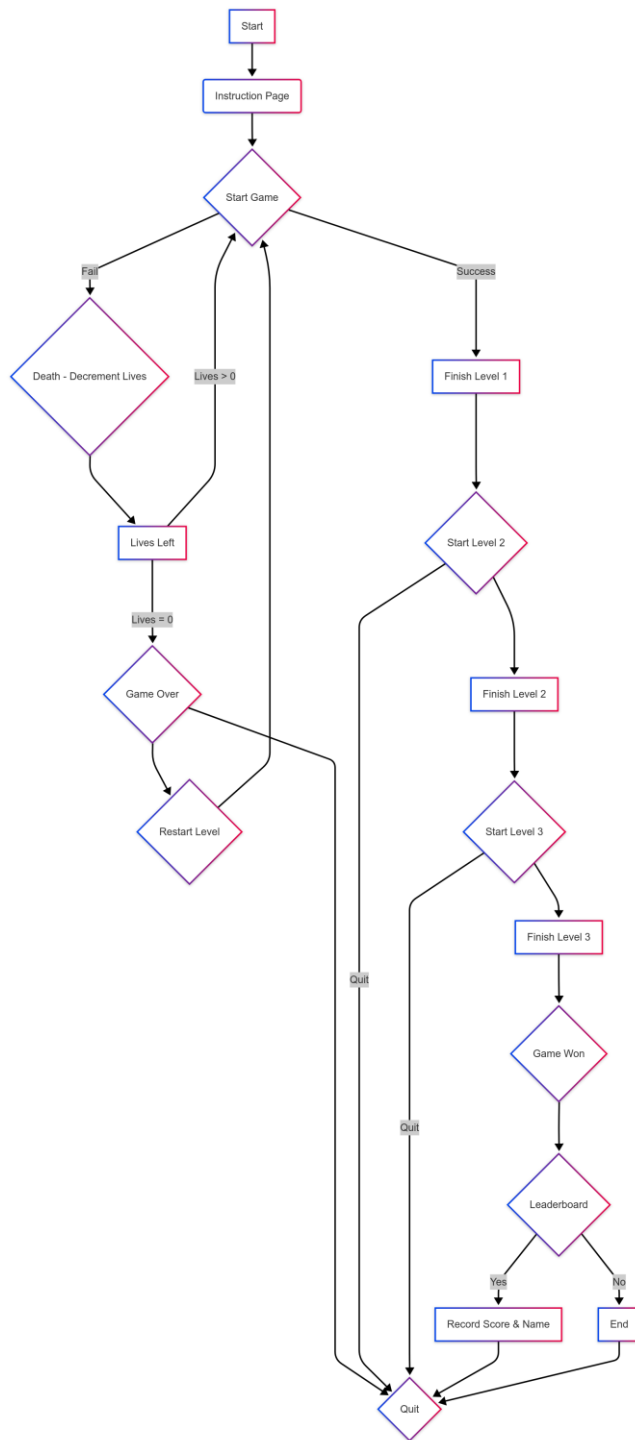

Requirements

- 2.1 Trackable Hit Points / Points (Mandatory)**
- 2.2 Mobile-Friendly Controls (Mandatory)**
- 2.3 Player Name Leaderboard (Optional)**
- 2.4 Set Number of Lives (Mandatory)**
- 2.5 Obstacle Movement (Mandatory)**
- 2.6 Multiple Levels (Optional)**
- 2.7 Distinct Background Themes (Optional)**
- 2.8 2D Physics for Character Movements (Mandatory)**
- 2.9 Power-Ups (Optional)**
- 2.10 Transition Loading Screens (Optional)**
- 2.11 Sound Effects (Optional)**
- 2.12 Randomized Obstacle Appearance (Optional)**
- 2.13 Portrait/Vertical Orientation (Mandatory)**
- 2.14 Instruction / Help Screen (Mandatory)**
- 2.15 Default Character Attributes (Mandatory)**

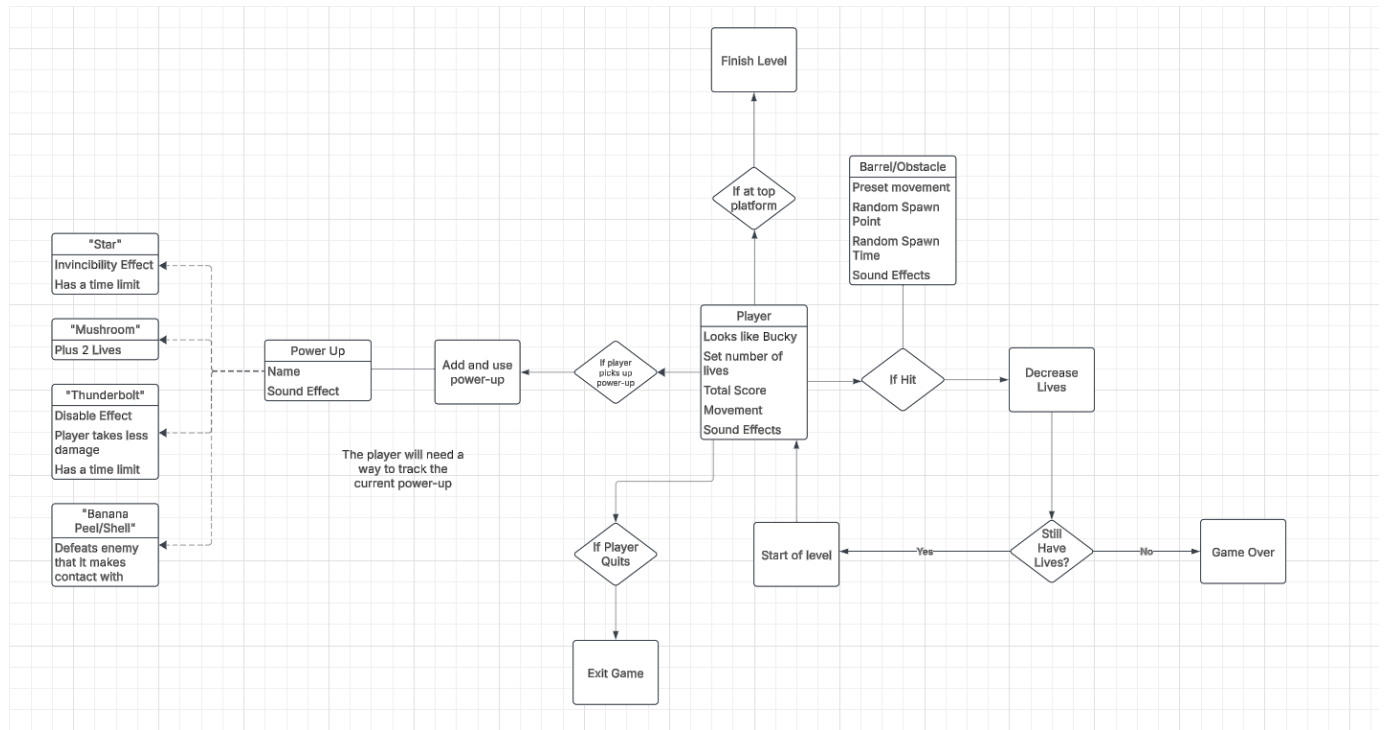

Traceability Matrix

Requirement:	Design Meets Requirement?	How?
2.1	P	Death system
2.2	Not yet	
2.3	P	Leaderboard box
2.4	P	Death system
2.5	Not yet	
2.6	P	Level boxes/advancement system
2.7	Not yet	
2.8	Not yet	
2.9	Not yet	
2.10	P	In concept; design has a transition period after finish of one level and before the next
2.11	Not yet	
2.12	Not yet	
2.13	Not yet	
2.14	P	Shown to player upon game start, before start of first level
2.15	Not yet
